

Trust but Verify, Monitor Everyone!

The Forrester Zero Trust Model

FIPCO Loan User Conference

November 3, 2010

Ken M. Shaurette, CISSP, CISM, CISA, CRISC

FIPCO

www.fipco.com

kshaurette@fipco.com

Forrester Research in September identified a so-called “Zero Trust” model for security.

The concept of “Zero Trust” means that end users are no more trusted than outsiders. As such it is important for organizations to monitor user traffic, from the outside as well as the inside.

With this model; security becomes an even more integral part of the network.

Two excuses why organizations don't monitor user activity:

1. No manpower to devote to log monitoring
2. Monitoring solutions are too expensive

There are solutions available to easily and reasonably monitor user activity.

Aristotle available through FIPCO Sales

The following presentation will consist of screen prints from the tool Aristotle.

Demonstrations can be requested to illustrate the actual Aristotle system by contacting FIPCO Sales.

CONSUMER UNIVERSAL NOTE

*Boxes checked are applicable.
Boxes not checked are inapplicable.*

(CUSTOMER) [Redacted] (DATE) [Redacted] \$ [Redacted]

1. Promise to Pay and Payment Schedule. I promise to pay to the order of [Redacted] (LENDER) at [Redacted] Wisconsin, the sum of \$ [Redacted] plus interest on the unpaid principal balance, according to the following schedule:

Lender is under no obligation to refinance the final payment at maturity. [Redacted]

2. Interest Calculation. This Note bears interest on the unpaid principal balance until the final scheduled maturity date: **(Check (a), (b) or (c); only one shall apply.)**

- (a) **Fixed Rate.** At the rate of [Redacted] % per year. [Redacted]
- (b) **Stepped Fixed Rate.** At the rate ("Note Rate") of n/a % per year until n/a and n/a % per year thereafter.
- (c) **Variable Rate.** At the annual rate ("Note Rate") which shall equal the Index Rate (as defined below), plus minus [Redacted] percentage points. However, the Note Rate will not exceed [Redacted] % per year and will not be less than [Redacted] % per year, and until the first Change Date (as defined below) the Note Rate shall be [Redacted] % per year. The Index Rate is: [Redacted]

The Index Rate may or may not be the lowest rate charged by Lender. If the Index Rate ceases to be available to Lender during the term of this Note, Lender may substitute a comparable index.
The Note Rate shall be adjusted only on the following Change Dates: [Redacted]

- (d) If box (b) or (c) is checked, an adjustment in the Note Rate will result in an increase or decrease in (1) the amount of each payment of interest, (2) the amount of the final payment, (3) the number of scheduled periodic payments sufficient to repay this Note in substantially equal payments, (4) the amount of each remaining payment of principal and interest so that those remaining payments will be substantially equal and sufficient to repay this Note by its scheduled maturity date, or (5) the amount of each remaining payment of principal and interest (other than the final payment) so that those remaining payments will be substantially equal and sufficient to repay this Note by its scheduled maturity date based on the original amortization schedule used by Lender, plus the final payment of principal and interest, and I agree to pay any such additional payments or amounts.

Interest is computed:
 (a) For the actual number of days principal is unpaid on the basis of a 365 day year on the basis of a 360 day year
