item processing products

Discover the advantages of our item processing products: Any numbering sequence needed for control documents can be produced on our advanced equipment. We provide a 100% guarantee of MICR readability on our control documents, which helps assure limited downtime on reader sorters. MICR grade paper allows for smooth item processing and low MICR reject costs. We also provide high quality document carriers, check strips and pressure-sensitive labels for incorrect or damaged MICR code lines.

"Return Item" preprinted on carrier (optional).

Return bank ABA #
RETURN ITEM

Translucent front for efficient microfilming and visual analysis.

LOW MINIMUM QUANTITIES TO REDUCE SPACE & COST OF INVENTORY

Minimum Order:	1,000
Normal & Economy Order:	Multiples of 1,000
Size:	4" x 9"

Although the Federal Reserve System requires the number 2 to be printed in position 44 in the MICR line, we do not guarantee the readability of this character when preprinted by us, due to potential alignment problems with characters post-encoded at the bank or processing center.

Sealable top.

804807 (Sealable/Non-imprinted/Non-encoded)
Color & Paper: Pink Bond Strip

Translucent front and back for microfilming and image capture.

**Heavy duty bond strip for MICR readability and processing durability.**
